

DocPoint Brings Project Hosts' Cloud Solutions & Services onto GSA Schedule 70

Partnership enables DocPoint Solutions to promote and sell FedRAMP SaaS-level compliant cloud solutions as part of a complete ECM system

Fulton, Md. – April 28, 2016 – DocPoint Solutions, Inc., a leader in the implementation, customization, training and support of SharePoint solutions and its integrated suite of products, has brought **Project Host Inc.'s** cloud solutions to onto its General Services Administration (GSA) Schedule 70. Through this partnership, DocPoint will be able to promote and sell FedRAMP SaaS-level compliant cloud solutions as part of a complete enterprise content management (ECM) system. Project Hosts is a CSP (Cloud Services Provider) with a FedRAMP Agency ATO (Authority To Operate) for its **Federal Private Cloud (FPC)** for Windows and Linux applications.

Project Hosts' FPC for Windows and Linux Applications provides cloud-based access to Microsoft applications including SharePoint, Project Server, Dynamics CRM, Power BI, Visual Studio, TFS, Remote Desktop, and Office; applications from other commercial software vendors such as AvePoint, Gimmel, Innovative-e, Nintex, eSignLive, UMT360 and more; and open source website content management applications such as Drupal, WordPress and Joomla. With Project Hosts' cloud solutions and services on DocPoint's GSA Schedule 70, federal agencies and government organizations have the benefit of turning to a single entity for a secure, compliant and cost-effective ECM solution that improves productivity, efficiency and enterprise-wide collaboration.

Scott Swidersky, president of DocPoint Solutions, said, "Like companies in the commercial sector, government agencies are turning to cloud-based solutions to promote information sharing across the enterprise in a more cost-effective, scalable manner. However, federal organizations must comply with strict standards to safeguard data and prevent security breaches. With Project Hosts on our GSA Schedule 70, we can offer these clients a complete, secure and compliant ECM solution in the Microsoft Azure Government cloud."

Project Hosts also offers a hybrid cloud architecture that allows agencies to leverage shared services for some functions (e.g. authentication, monitoring, scanning) while still having the option to choose dedicated servers for applications and databases. The option for dedicated servers allows agencies to meet compliance requirements and also provides them with greater flexibility to implement customizations to meet their functional requirements.

Scott Chapman, CEO and co-founder, Project Hosts, Inc., said, "Adding our solutions and services to DocPoint's GSA Schedule will help Project Hosts further extend our solutions into the marketplace, as DocPoint has extensive experience in the federal sector. The combination of DocPoint's integration expertise and our FedRAMP compliant solutions will help government agencies quickly deploy and adopt a cloud-based ECM system without an added IT burden."

About Project Hosts

Project Hosts, Inc. is a CSP (Cloud Services Provider) with a FedRAMP Agency ATO (Authority To Operate) for their Federal Private Cloud (FPC) for Windows and Linux applications. Project Hosts provides Secure Cloud Services for Azure Subscriptions and Hosted Microsoft Solutions and ISV applications.
