

# DocPoint Solutions Partners with eSignLive to Offer SharePoint-Integrated E-Signatures

## Strategic partnership will allow ECM leader to help customers move to a paperless office, enable compliance and support their digital transformation strategy

**Fulton, Md. – April 11, 2016 – DocPoint Solutions, Inc.**, a leader in the implementation, customization, training and support of SharePoint solutions and its integrated suite of products, has partnered with **eSignLive™**, the e-signature choice for business, to seamlessly integrate electronic signatures into SharePoint. This strategic partnership will allow DocPoint to help its customers—including those in the federal government space—move to a paperless office, enable compliance and support their digital transformation strategy.

Available on DocPoint's General Services Administration (GSA) Schedule 70, in-country in the United States, Canada, Europe, Australia, as well as in a FedRAMP SaaS-level compliant cloud, eSignLive provides highly flexible and configurable e-signing experiences that offer strong legal protection and regulatory compliance. By combining the power of eSignLive with DocPoint's proven methodology for designing, implementing and delivering SharePoint solutions, organizations can obtain more value from their enterprise content management (ECM) investment, while meeting industry security standards. In addition, DocPoint can integrate eSignLive with Nintex Workflow and Forms to provide users with even greater productivity.

"To comply with an increasing number of security standards, government and commercial regulations are requiring many organizations to shift to digital processes," said Scott Swidersky, president of DocPoint Solutions. "By adding eSignLive to our core solution set, we can help clients meet these standards as they use SharePoint to promote information flow and drive new business efficiencies. And, with our training services and support, our clients can ensure faster user adoption rates and generate greater return on investment (ROI)."

Notably, government agencies can use eSignLive in conjunction with a Common Access Card (CAC)/PIV smart card to sign documents in e-contracting, procurement, finance, human resources, supply chain management and operations, both in-person and in the field.

To learn more about how DocPoint and eSignLive's solutions are helping organizations move faster towards compliance, download the on-demand webinar, "Are e-signatures part of your paperless office?" here: [esignlive.com/resource-center/are-e-signatures-part-of-your-paperless-office/](http://esignlive.com/resource-center/are-e-signatures-part-of-your-paperless-office/).

### About eSignLive™ by VASCO®

eSignLive™ is the electronic signature solution behind some of the world's most trusted brands. Regulated industries and top analyst firms recognize eSignLive's products and services for their ability to balance the highest levels of security and compliance with ease-of-use while automating any process – from the simplest, internal signing workflow to the most complex, customer-facing transactions. Available in the cloud and on-premises, the eSignLive solution offers a scalable platform to support an organization's digital transformation strategy across the enterprise – today and tomorrow.

eSignLive is the trade name of Silanis Technology Inc., a VASCO group company. VASCO Data Security International Inc., a global leader in authentication, electronic signatures and identity management, enables more than 10,000 customers in 100 countries to secure access, manage identities, verify transactions and protect assets across financial, enterprise, e-commerce, government and healthcare markets.
